Instructions for use (IFU) — RDM’s user manual

Document ID	IFU-001
Revision	6
Date	2026-11-10
Status	Controlled in git

Contents

1 Purpose 3
2 How it is controlled 3

Id: `IFU-001` · Kind: `manual` · Revision: `6` · Pages: `docs/index.md, docs/about/intended-use.md, docs/about/how-rdm-works.md, docs/about/plan-vs-record.md, docs/about/safety.md, docs/install/installation.md, docs/install/getting-started.md, docs/use/index.md, docs/use/changing-the-record.md, docs/use/spec-and-tests.md, docs/use/risk-register.md, docs/use/validation-evidence.md, docs/use/gates.md, docs/use/gap-analysis.md, docs/use/ci.md, docs/use/graph.md, docs/use/graph-explorer.md, docs/use/agents.md, docs/use/documents.md, docs/troubleshooting.md, docs/reference/index.md, docs/reference/cli.md, docs/reference/api.md, docs/reference/glossary.md, docs/reference/worked-example.md, docs/revision-history.md`

1 Purpose

RDM's instructions for use (IFU) are its user manual, the documentation site: what anyone who uses RDM follows to keep a record the way RDM's gates enforce. It is a design output, and this controlled document is its entry in the device-master-record index (`rdm story dmr`): the pages listed above, at the revision of the release they ship with.

2 How it is controlled

- **Approval:** each change to a page is a reviewed pull request; the release tag fixes the version that ships.
- **Requirements:** what the manual must hold is stated as requirements of the publishing context (item-07-005, item-07-006, item-07-007), verified like any other.
- **Changing this list:** adding or removing a page changes this document, so its revision is bumped.
